Quietflow Side Entry Inlet Valve

Installation Instructions

1. Ensure main water is turned off.
2. Disconnect existing inlet valve and remove from cistern.
3. Place new inlet valve into cistern, carefully fitting it to the side entry bracket on the top of the outlet valve mechanism.

4. Fit nut and firmly tighten to secure in place.
5. Turn mains water on.
6. Set the water level to the original water level mark in the cistern by using the adjusting screw located on the inlet valve.

Always ensure work is carried out by a licensed plumber.
Warranty claims can only be made with proof of installation by a licensed plumber.
